## Glottometrics 19, 2009 (including abstracts)

**Best, Karl-Heinz**

Wortlängen im Englischen 1-10

**Abstract.** The aim of this paper is to show that word lengths in English texts follow certain distribution laws. The findings lend support to the theory of word length distributions (Wimmer et al. 1994, Wimmer & Altmann 1996) once more.

**Lewizkij, Victor; Matskulyak, Yulia**

Semantische Kombinierbarkeit von Komponenten in der Struktur der deutschen Komposita 11-41

**Abstract.** The semantics of nouns, adjectives and verbs as components of compound words was studied; also the peculiarities of their combination in the models N+N, A+N, V+N were analyzed. The main characteristics of the combinatory were established as combinatory range, strength (intensity) of a tie, and the number of significant ties.

**Tuzzi, Arjuna; Popescu, Ioan-Iovitz; Altmann, Gabriel**

Parts-of-speech diversification in Italian texts 42-48

**Abstract.** In the present article some characteristics of the rank-frequency distribution of parts-of-speech in the End-of-year speeches of Italian presidents are scrutinized. The result is compared with some other languages.

**Eeg-Olofsson, Mats**

A word length regularity and its genesis 49-69

**Abstract.** Data from several typologically and genetically distinct languages show that the distribution of length in letters or phonemes of word types fits the Good distribution, the discrete analogue of the Gamma distribution. It is suggested that this is an equilibrium distribution, resulting from long oral tradition of language between successive generations. Length redistribution can take place when juxtaposed words in speech are re-interpreted by second generation listeners. Simulations show that a certain kind of random shifting of word boundaries results in a lexicon whose word lengths are also well fitted by the Good distribution. The fit remains close even if a limited amount of compounding is introduced into the simulations.

**Sanada, Haruko; Altmann, Gabriel**

Diversification of postpositions in Japanese 70-79

Abstract. **In this study we show the place of the diversification of Japanese postpositions in the hierarchy of different language phenomena. The Popescu indicator is computed from three different texts.**

### **Best, Karl-Heinz**

Zur Entwicklung der Entlehnungen aus dem Japanischen ins Deutsche **80-84**

**Abstract.** This study presents a further support of the logistic law, known in linguistics as Piotrowski law, using data which can be gathered from *Kleines Lexikon deutscher Wörter japanischer Herkunft* (2008).

### **Čech, Radek; Mačutek, Ján**

Word form and lemma syntactic dependency networks in Czech: a comparative study **85-98**

**Abstract.** We compare several parameters of word form and lemma syntactic dependency networks in Czech. Models for degree distributions are suggested.

## **History of Quantitative Linguistics **99-101****

### **Best, Karl-Heinz**

**XLI. William Palin Elderton (1877-1962) **99-101****

**Glottometrics** ist eine unregelmäßig erscheinende Zeitschrift für die quantitative Erforschung von Sprache und Text.

**Beiträge** in Deutsch oder Englisch sollten an einen der Herausgeber in einem gängigen Textverarbeitungssystem (vorrangig WORD) geschickt werden.

Glottometrics kann aus dem **Internet** heruntergeladen, auf **CD-ROM** (PDF-Format) oder in **Buchform** bestellt werden.

**Glottometrics** is a scientific journal for the quantitative research on language and text published at irregular intervals

**Contributions** in English or German written with a common text processing system (preferably WORD) should be sent to one of the editors

Glottometrics can be downloaded from the **Internet**, obtained on **CD-ROM** (in PDF) or in form of **printed copies**
